How can a Precious Metals IRA help protect your wealth?

Pursuing financial security has never been more crucial in a world of market instability, soaring inflation rates, and unprecedented global uncertainty. Amidst the shifting sands of economic landscapes, an investment avenue has stood the test of time and proven its resilience: Precious metal IRAs. As traditional investment options face growing challenges, the allure of precious metals shines brighter than ever before. In this brochure, we invite you to explore the undeniable benefits of Precious Metal IRAs, a strategic move towards safeguarding your wealth, preserving purchasing power, and securing a prosperous retirement amidst the precariousness of today's financial climate.

What exactly is a Precious Metals IRA?

A Precious Metal Individual Retirement Account (IRA) is a unique self-directed individual retirement account. A precious metals IRA could be an

excellent option based on your investment goals and objectives. Traditionally, the joint investments for an IRA account include stocks, mutual funds, and bonds. However, since 1975, individuals have been allowed to invest in gold and silver through self-directed IRAs. This freestanding IRA account puts you in control by allowing you the flexibility to invest in precious metals and some other conventional methods, such as bonds and other assets, simultaneously.

A self-directed IRA with one of our trusted partners allows account holders to buy the full range of allowable assets, including precious metals. Investors can turn any plan type (Traditional IRA, Roth IRA, SEP IRA, SIMPLE IRA) into a self-directed IRA if the custodian holds the account. Many people have experience investing their funds in precious metals and are now looking to capitalize on that experience and generate retirement wealth that is tax-deferred or tax-free.

PRECIOUS METAL IRA FAQ'S

Are there any tax penalties when transferring funds from my IRA to a Precious Metals IRA?

No, there are no taxes or penalties if you follow the procedures. Your dedicated IRA team member will work directly with you to ensure that the proper procedure is followed and that we safely and securely roll over funds between retirement accounts in a way that does not incur any taxes or penalties.

Do I own the precious metals?

Yes, when you open a Precious Metal IRA, you own the physical Gold, Silver, and Platinum you purchase.

Where are my metals stored?

Your assets are stored at an IRS-approved private vault called a "depository." Depositories are located on the east and west coasts and in the central US, allowing for endless storage possibilities no matter where you reside within the US. Rest assured that Premier Coin Galleries has your precious metals fully insured to arrive safely at their destination.

WITH PREMIER IT'S AS EASY AS 1, 2, 3!

Step 1: Pick A Custodian:

Only a few select companies can manage IRA accounts. These companies provide all necessary documents and services such as statements, billing, withdrawals, beneficiaries, and all required administrative needs for your metals IRA.

Step 2: Select A Precious Metals Broker:

Premier Coin Galleries has been a top-rated, licensed, and accredited gold and silver dealer for over 30 years. Our experience is unmatched for buying, liquidating, and exchanging metals for our clients.

Step 3: Select A Storage Facility:

Only a few facilities approved by the United States government and IRS are insured to store precious metals for IRAs. Here at Premier, we will assist you in choosing the finest facility that meets your needs!
